In general, Account Info assists Agent to search for and manage member information and settings (Position Taking, Bet Setting, Commission, etc.).

## 1. Search Account

As the title says, this function assists Agent to search for downline accounts only, and it is the first required step in Account Info function.

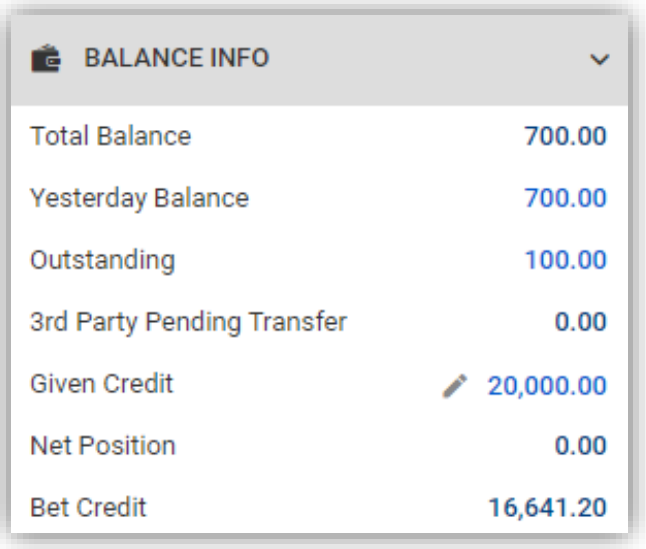

Enter an account and click 🔍 button to display the target account details:

- Click the downline name to view their logs. If the account is closed/locked, the downline name will be highlighted in:
  - **Purple**: closed by Admin.
  - **Orange**: closed by uplines.
  - **Blue**: locked by the system due to incorrect security code or OTP.
  - **Grey**: locked by the system due to incorrect password.
- **Statement**: view the Statement report of the target account.
- **Bet List**: view the target account's Bet List.

## 2. Balance Info

Balance Info section provides Agent with the information related to balance, outstanding, credit, and can proceed with the transfer function of the target account.

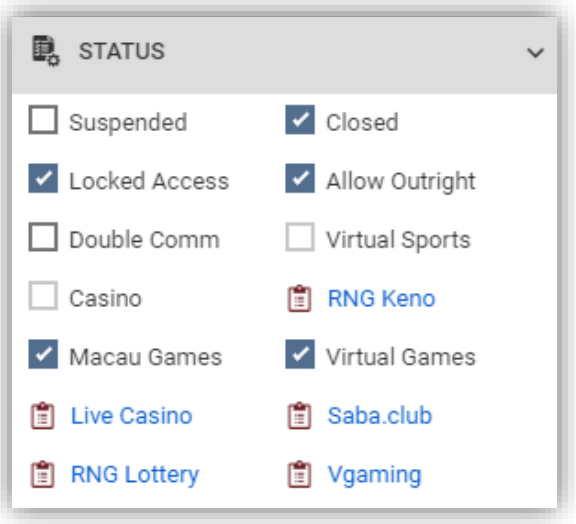

- **Total Balanc**e: the real win/loss amount including transfer amount calculated until today.
- **Yesterday Balance**: the real yesterday win/loss amount including transfer amount calculated until now.
- **Outstanding**: betting amount on running tickets.
- **3rd Party Pending Transfer**: the amount of balance transferred to the 3rd party wallet.
- **Given Credit:** betting amount given when this account was created.
- **Net Position**: the minimum payout that member could get from his/her tickets bet on Match Winner of each Cricket match.
- **Bet Credit**: the available amount to place bet.

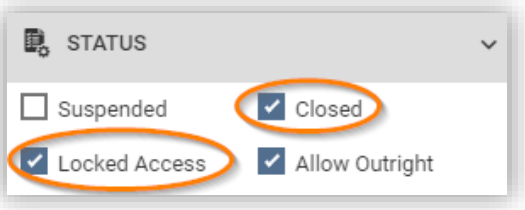

## 3. Status – Setting – Login – Online List

### 3.1. Status

This section gives Agent a quick look at account overall settings and allows him/her to change those values (account status, or enable/disable betting products/bet types).

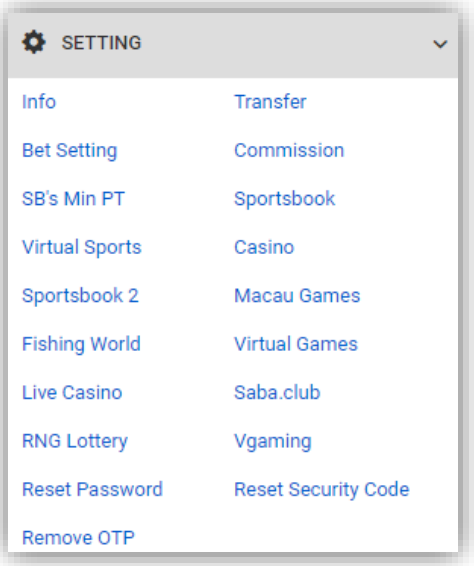

If an account is either locked or closed, the corresponding checkboxes (Closed Status and Locked Access) will be ticked:

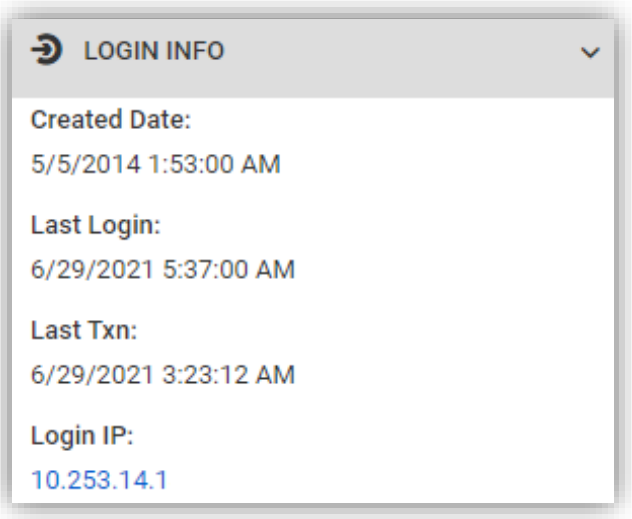

### 3.2. Setting

This section separates the account info and settings into small options, which gives Agent fast access to edit each option such as member information (general info, reset password) or his/her settings (Commission, Bet Setting, Min Bet, Max Bet, etc.) on each product (Sportsbook, Casino, Virtual Sports, etc.).

### 3.3. Login Info

Login section displays the created date, last login, last transaction time, and the IP address from that last login of the target account.

### 3.4. Online List

Online List section declares whether the target account is online. If the account is online, it will show the IP address and Login time. Otherwise, “This user is not online” message will be displayed.
