PROGRESSIVE JACKPOT GUIDELINE

1. Introduction

Progressive Jackpot allows player to place a bet that have chance to take home the offered progressive jackpot.

2. Jackpot Contribution

The size of the Jackpot pool is based on the contribution made from certain % of total bets on the Jackpot bet that contributed by agents & house, depends on the Position Taking of each party.

The contribution amount = {Position Taking %} * {contribution rate} * {Jackpot bet value}

- **Jackpot bet value:** the amount bet on the Jackpot game.
- **Jackpot pool:** the pool that is used to pay for the Progressive Jackpot prize.
- **Contribution rate:** the percentage of each bet goes into the Jackpot pool.

For example:

The Position Taking on member = 10%

- Total contribution rate = 5%
- Jackpot bet value = $0.25

Note: the contribution amount will be rounded to 4 decimal places.

→ The contribution amount = 10% * 5% * $0.25 = $0.00125 ≈ $**0.0013**
