CREATE MEMBER WITH QR CODE GUIDELINE

1. Introduction

We are delighted to announce the launch of a new function "**Create Member with QR code**". Not only does it support the creation of a new member account quickly, it also helps member to log into the member site and start the experience immediately.

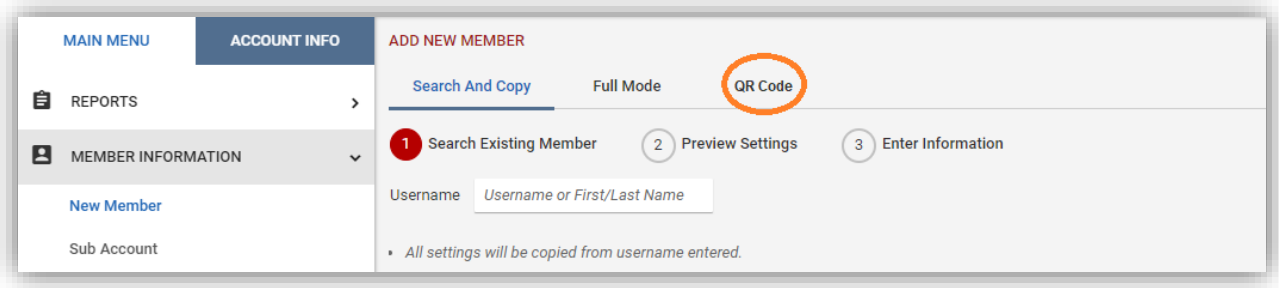

2. Create new Member account via QR code

Step 1: Access to the new function for creating a new account, you can do this in 3 ways:

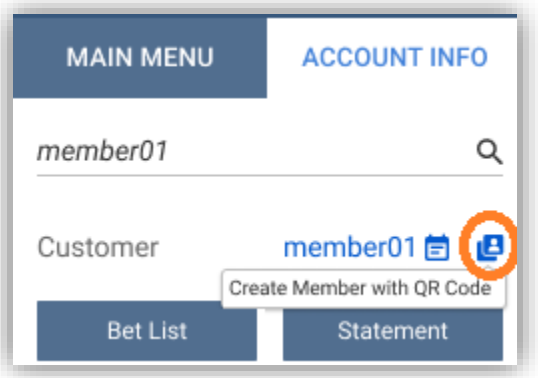

- Top right menu.

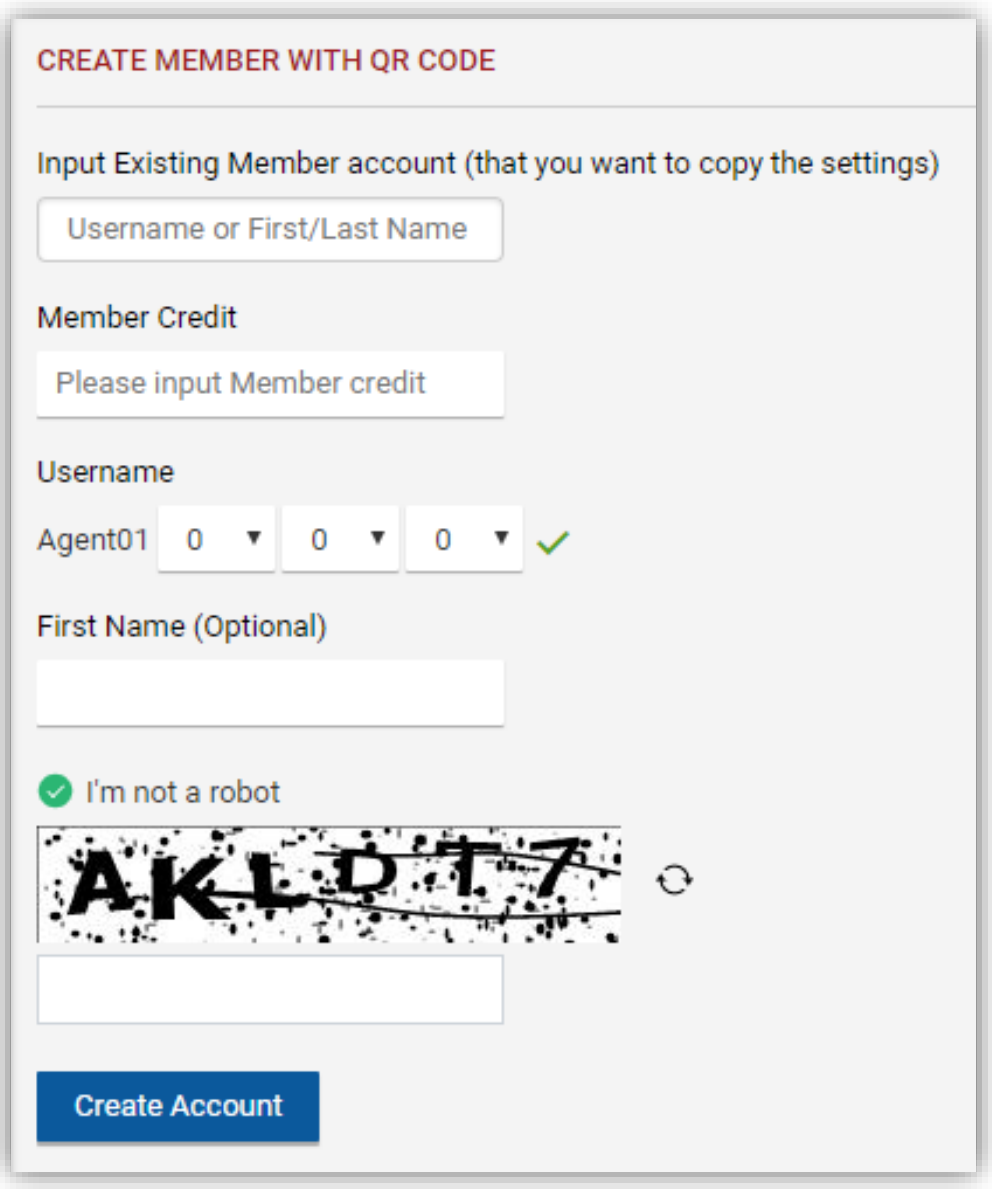

- Add new Member page (QR Code tab).

- Account Info (next to the member's username).

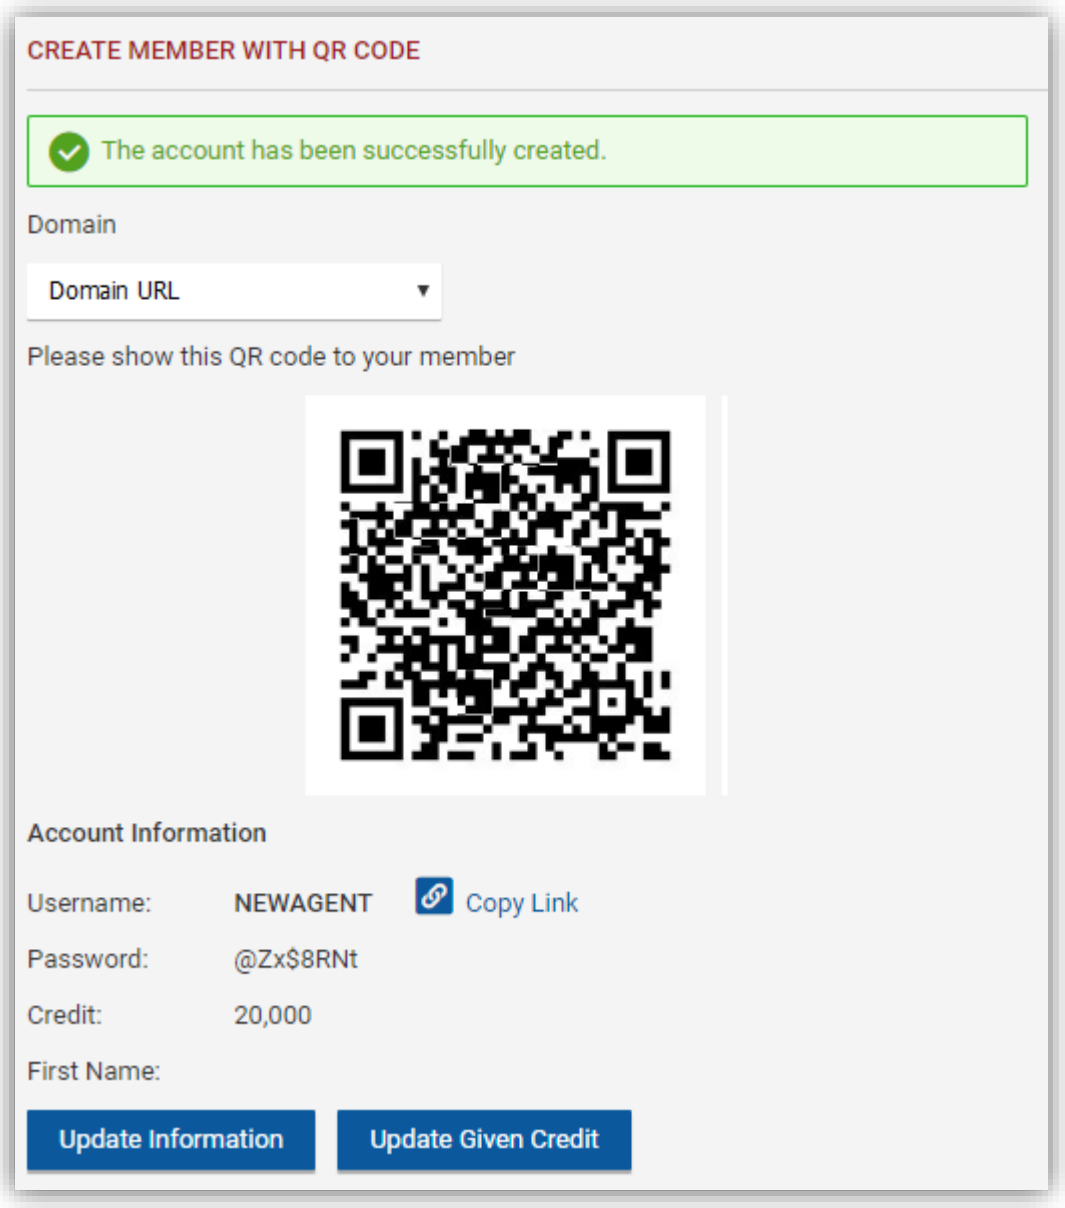

Step 2: Fill in the information.

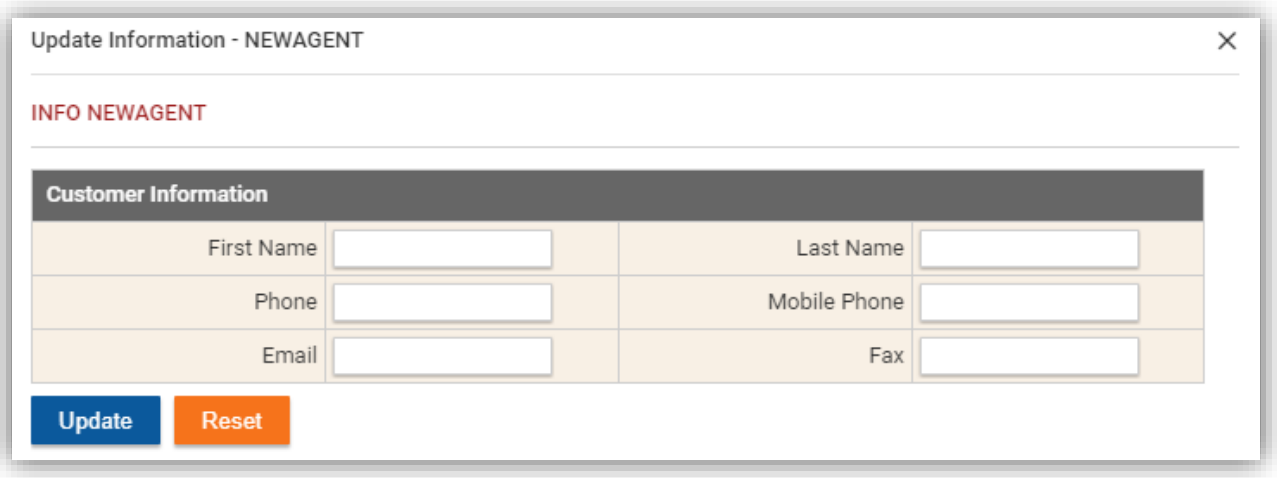

- In case you access this function by clicking the icon on the Account Info, the *Existing Member account* and *Member Credit* fields will be automatically filled in with the corresponding data.

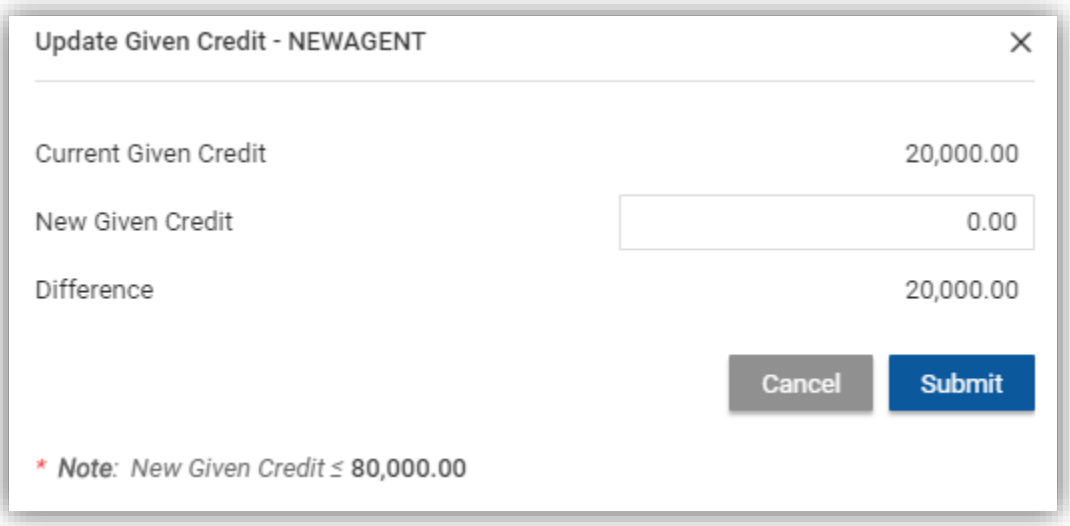

Step 3: Select a domain url and complete the account creation process.

At this point, Member can scan this QR code directly (recommended), or you can send them the QR code manually by clicking on the "**Copy link**". Either way will help Member to reach the Member site and here they will be forced to change the password (for security purposes).

You can also edit Member's info such as First Name, Last Name, Mobile Phone, etc. or their given credit amount by clicking on the **Update Information** button or **Update Given Credit** button:

3. Notes

- Once an account has been successfully created, for the next use, the *Existing Member account* and *Member Credit* fields (in step 2) will be automatically filled in with the previous account data.
- In a day, you can create up to 200 member accounts using this method. After reaching that number, the message "*You can only create up to 200 new members every day by this function*" will be displayed if you click on the **Create Account** button.
